

RADAR KIT II

Product specification

- ✓ Expansion kit for the CSC-TOOL that enables it to be used for the calibration of radar-based Advanced Driver Assist Systems (ADAS)
- ✓ Specifically designed for the mirror-less radar system used on Mercedes-Benz models
- ✓ Makes the CSC-TOOL the most comprehensive ADAS calibration tool currently available

A VALUABLE ADDITION TO A VITAL WORKSHOP TOOL

The number of new passenger car models equipped with Advanced Driver Assist Systems (ADAS) is growing at a rapid rate. The cameras and sensors used by these systems require precise calibration after many common workshop procedures, such as windscreen replacement or axle geometry, otherwise these vital safety systems will operate incorrectly, or even fail completely.

The CSC-TOOL from HELLA GUTMANN SOLUTIONS is the only truly universal, or 'multi-brand', workshop tool currently available for ADAS calibration.

Now, RADAR KIT II, an expansion kit for the CSC-TOOL, extends its capability and gives workshops the ability to accurately calibrate radar-based ADAS in addition to camera-based systems.

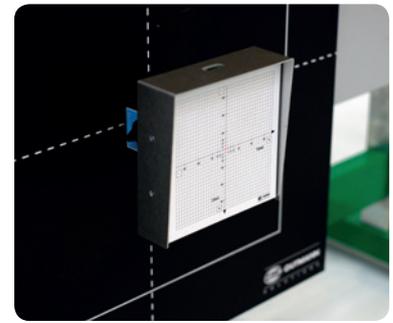

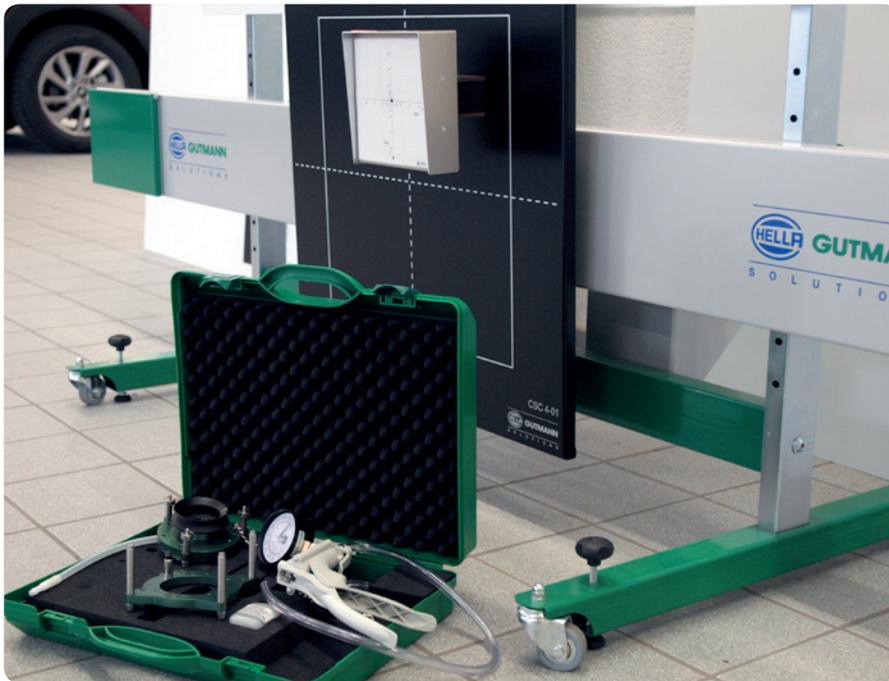

SPECIFICALLY DESIGNED FOR MERCEDES-BENZ MODELS

Whilst there are two forms of radar-based ADAS, RADAR KIT II is specifically designed for the mirrorless radar-based ADAS used by certain Mercedes-Benz models.

A COMPLETE SOLUTION

A separate expansion kit, RADAR KIT I, is available for the calibration of the alternative radar-based systems, some of which feature a mirror in conjunction with the radar sensor, commonly used BMW, VAG and the remainder of ADAS-equipped Mercedes-Benz models.

Workshops equipped with the CSC-TOOL and the various expansion kits available for it can be confident that they have a comprehensive ADAS calibration solution.

RADAR KIT II

RADAR-BASED ADAS IDENTIFICATION GUIDE

VARIANT 1

Radar sensor with mirror used by VAG models.

Use RADAR KIT I

VARIANT 2

Radar sensor without mirror, used by BMW, VAG and on certain ADAS-equipped Mercedes-Benz models.

Use RADAR KIT I

VARIANT 3

Radar sensor without mirror, used by Mercedes-Benz on certain ADAS-equipped models.

Use RADAR KIT II

ALSO AVAILABLE FROM HELLA GUTMANN SOLUTIONS: CSC TOOL

The CSC TOOL (Camera and Sensor Calibration Tool) from HELLA GUTMANN SOLUTIONS enables accurate calibration of the cameras and sensors used by Advanced Driver Assist Systems, such as Adaptive Cruise Control or Lane Departure Warning, which are increasingly commonplace on many mid-range vehicle models.

RADAR KIT II CONTENTS

- Casing
- Seal for adjustment procedure with vacuum bell
- Centring aid for vehicles manufactured from 2004
- Centring aid for E-Class
- Hand vacuum pump
- Adjustment tool
- Vaseline
- Operating instructions

HELLA part number: 8PZ 010 611-251
